USING WATER EFFICIENTLY IN THE HOME

Water is a vital resource to our planet and the living things that inhabit it.

With booming populations and ongoing drought conditions, our water resources are becoming taxed.

Protecting and preserving the nation's water supply is critical to our economy, environment, and human health. Using water efficiently now will help ensure water supplies for future generations.

Use the tips section to the right to learn how you can take action to conserve water.

Replace your toilet with a low flow model that uses less than 1.3 gallons per flush. It can **reduce indoor water usage up to 20%**.

Fully load automatic dishwashers. It uses the same amount of water regardless of the size of the load.

Replace your washing machine with an Energy Star qualified model. It can **save you up to 7,000 gallons** of water per year!

Fix leaky faucets, toilets, and plumbing joints. **You can save 20 gallons per day** for every leak stopped!

The Natural[®]

ONLY FROM CHEM-DRY

An Environmentally Sound Approach to Carpet Cleaning

The Carbonating Secret Revealed

The secret to Chem-Dry's drier, healthier clean is the millions of microscopic carbonating cleaning bubbles in our primary cleaner we call The Natural[®]. The carbonating solutions penetrate deep into the base of the carpet, literally exploding dirt and grime off of the fiber's surface. Then, we use hot water extraction to lift the dirty particles to the surface where they are whisked away.

If you have ever used club soda to remove a stain from a shirt, you know how the carbonating principle works. We merely perfected it for carpet. The awesome cleaning power of carbonating solutions creates a powerful reaction that deep cleans carpets in a safe and gentle way.

Carpets not only GET cleaner, they STAY cleaner longer

Because the bubbles do the work for us, Chem-Dry does not need to use the gallons of soapy cleaning chemicals that other cleaners or do-it-yourself machines rely on so much. Soapy residues attract dirt like a magnet - causing your carpet to get dirty again faster than ever. And the more times they clean the worse the problem gets.

Chem-Dry's primary carpet cleaner contains no soaps, detergents or surfactants. The Natural is safe for kids and pets - plus, a Chem-Dry cleaning means you'll be back on your carpets quicker; they'll be dry in only 1-2 hours, not 1-2 days. You save money when your carpet stays cleaner longer. Less cleanings means better value for you and one less thing you need to worry about. Chem-Dry recommends routine home vacuuming and annual professional carpet cleanings.

Reappearing Carpet Stains? No problem with Chem-Dry

Carpet Stains reappear in the same place after cleaning for two reasons. 1) They were never thoroughly removed in the first place and the soaps used and/or the uncleaned sticky substance collects more dirt; or 2) The unwanted material is forced down below the surface of the carpet by a high pressure steam cleaning unit - only to "wick" back up as the carpet dries.

Chem-Dry, the carbonated carpet cleaner, thoroughly removes stains quickly and efficiently - without causing more problems in the process. And because we apply our solutions so sparingly, without high pressure, wicking is not a problem. And, if for some uncharacteristic reason a spot does reappear, then we will reappear too, until the problem is rectified. Chem-Dry technicians are trustworthy and professional. You're sure to be impressed with our first-class service from your local Chem-Dry provider.
